

Kinder Morgan, Inc. is one of the largest energy infrastructure companies in North America. We own an interest in or operate approximately 84,000 miles of pipelines and 155 terminals. Our strategy is to grow our distributable cash flow (DCF) per share to stockholders by expanding, building and acquiring primarily fee-based energy infrastructure in growing domestic markets. In essence, we operate like a giant toll road – primarily providing energy transportation and storage services to U.S., Canadian and Mexican economies. Our assets generate substantial, stable cash flow with modest direct commodity exposure. Approximately 91 percent of our cash flows are fee-based and approximately 97 percent are fee-based or hedged based on our 2017 published budget.

Kinder Morgan has an unparalleled asset footprint spanning the U.S. with leading North American industry positions in each of its five business segments – Natural Gas Pipelines, CO₂, Products Pipelines, Terminals and Kinder Morgan Canada.

- Largest natural gas transporter and storage operator in North America with approximately 70,000 miles of pipelines. Our **natural gas pipelines** are connected to every important natural gas resource play, including the Eagle Ford, Marcellus, Utica, Bakken, Haynesville, Fayetteville and Barnett. We move approximately 40 percent of the natural gas consumed in the U.S.
- Largest independent transporter of petroleum products in North America, transporting about 2.1 million barrels per day. Our **products pipelines** move gasoline, jet fuel, diesel, crude, natural gas liquids and more.
- Largest transporter of carbon dioxide (CO₂) in North America. We transport approximately 1.3 billion cubic feet per day of CO₂. Most of the CO₂ is used in enhanced oil recovery projects in the Permian Basin of West Texas.
- Largest independent **terminal** operator in North America. Our liquids terminals store refined petroleum products, chemicals, ethanol and more, and have a capacity of approximately 152 million barrels. Our dry bulk terminals store and handle such materials as coal, petroleum coke and steel, and we handle over 53 million tons of bulk materials annually. We also have a strong Jones Act shipping position with 12 vessels in service and four more to be delivered in 2017.
- Only oilsands pipeline serving the West Coast in Canada. **Kinder Morgan Canada's** Trans Mountain pipeline system transports crude from Alberta to British Columbia and Washington state, and our proposed expansion will increase that capacity to approximately 890,000 barrels per day.

Additional Highlights

- Kinder Morgan is a company run by shareholders for shareholders. Kinder Morgan’s senior management interests are closely aligned with those of the company’s public shareholders, collectively owning approximately 14 percent of shares outstanding as of Dec. 31, 2016.¹ Executive Chairman Richard D.
