The Kinder Morgan Strategy

Same Strategy Since Inception

- Focus on stable, fee-based assets which are core to the energy infrastructure of growing markets
- Increase utilization of assets while controlling costs
  - Classic fixed cost businesses with little variable costs
  - Improve productivity to drop all top-line growth to bottom line
- Leverage economies of scale from incremental acquisitions and expansions
  - Reduce needless overhead
  - Apply best practices to core operations
- Maximize benefit of a unique financial structure which fits with strategy
  - MLP avoids double taxation, increasing distributions from high cash flow businesses
  - Strong balance sheet allows flexibility when raising capital for acquisitions / expansions
Management Philosophy

- **Low Cost Asset Operator**
  - Senior management limited to $200,000 per year in base salary
  - No planes, sports tickets, etc.

- **Attention to Detail**
  - Weekly operations and financial assessment
  - Monthly earnings and accounts receivable review
  - Quarterly strategic review

- **Risk Management**
  - Avoid businesses with direct commodity price exposure wherever possible
  - Hedge incidental commodity price risk

- **Alignment of Incentives**
  - Bonus targets are tied to published budget – KMP DCF of $2.84 and KMI EPS of $3.71 for 2004
  - All employees have equity-based incentives.
  - Rich Kinder has the largest equity stake in the energy industry — 20% in KMI
  - He receives $1 per year in salary, no bonus, no options
